

SEPTONAL

Hand and surface disinfectant for routine external use

Bicoide

Active substances: 80g Ethanol/100g

Recommended use: For external application, do not dilute.

Hygienic hand disinfection:

Use 2-3ml of Septonol on hands and rub in. Duration of treatment - 30 seconds.

Surface treatment:

Spray 100mL per 1m² surface. Duration of treatment - 10 min.

Do not treat wounds and mucosal surfaces!

For further information see safety data sheets.

Storage precautions:

Store in a carefully sealed original packaging in a dark place with temperatures of up to 20°C; keep away from fire and sunlight. Keep out of reach of children. Avoid contact with eyes and ingestion! Do not keep with food or animal feed.

Safety requirements:

Keep away from additives, degradation catalysts, alkalis, solvents, and flammable substances. Avoid inhalation. In case of contact with eyes, rinse with plenty of water. Seek immediate medical attention! In case of accident or health problems, seek medical help.

Hazard statements:

H225 Highly flammable liquid and vapour.

H319 Causes serious eye irritation.

H332 H335 May be harmful if inhaled; may cause respiratory irritation.

H336 May cause drowsiness or dizziness.

Waste treatment: Classified as hazardous waste. Dispose of contents and container in line with national laws and regulations. Rinse container with water to remove the remaining liquid before disposal!
